PROJECTS

| | |
|---|---|
| My-Portfolio | git.io/xxxx |
| My-Portfolio is web-based app developed by React and is still under development. This portfolio web-app will contain 3-pages Home, Project and Resume. This project has helped me in adding knowledge to my Tech-Stack. | |

| | |
|--|---|
| TinDog Website using bootstrap | git.io/xxxx |
| TinDog Website project is a simple front-end website developed using Bootstrap. I learnt Bootstrap for developing this project and got familiar with bootstrap. This website has four sections Home, Contact, Pricing and Download. Home page shows the basic information of website. Contact section has social media link shown by icons. Pricing session has cards. | |

| | |
|---|---|
| Hotel-Management-System | git.io/xxxx |
| This software helps the manager to manage the whole day bills of customers. By improving customer's satisfaction, they will attract more customer towards their hotel and due to these hotel management and economical status will improve automatically. | |
